Career Objective:

- To build a career in Web Development and UI Design where I can apply my skills in HTML, CSS, JavaScript, React.js, and Figma, continuously improve my technical knowledge, and contribute effectively to the organization.

Technical Skills:

Web Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript,React.js

UI/UX: Figma, Responsive Web Design

Basic Programming Language:C, C++ (Basic proficiency)

EXPERIENCE:

UI Designer & HTML/CSS Developer (Part-Time)

Sanntra Pvt. Ltd., Delhi (Remote) | Present

- Designed responsive UI layouts using Figma.
- Converted Figma designs into responsive web pages using HTML5 and CSS3.
- Collaborated with the development team to create responsive and user-friendly web interfaces.

Projects:

1. Student Management System (Param Technology)

Tech Stack: HTML5, React.js, Tailwind CSS, Node.js, MySQL**.**

Description: Developed a responsive web-based application to manage student registrations, course enrollments, batch schedules, and complete student records from a single interface. Designed clean and interactive pages using React & Tailwind CSS for smooth navigation. Implemented backend functionality with Node.js and MySQL for secure data processing.

Key Highlights:

- Built responsive and user-friendly UI using React + Tailwind CSS.
- Implemented student registration, course/batch management, and record handling.
- Integrated CRUD operations for adding, updating, and viewing student details.
- Used MySQL database for secure storage and fast retrieval of student information.

Other Projects:

- **Image Gallery** – Responsive gallery with transitions & filtering
- **Kisan Connect** – Agriculture information website
- Multiple static UI websites built using HTML, CSS & JavaScript

Hobbies and interest:

- Drawing.
- Listening to music.
